Advanced Mobility Products Inc. & Great Taiwan Gear Partnership

May 2020 Press Release

Advanced Mobility Products Inc. (AMP) is a proud Canadian owned and operated engineering consulting firm incorporated in 2018, dedicated to sustainable electrification and engineering solutions. AMP is pleased to partner with Great Taiwan Gear (GTG) as a North American partner for supply of gears, geared assemblies, and transmissions for various industries such as automotive, mining, aerospace, oil and gas and infrastructure. In this partnership, AMP will also be supporting the Americas region with application engineering on behalf of GTG.

As both company's philosophies are in line with development of high quality gears, efficient powertrains and electrification, a strategic partnership has been developed between both organizations. AMP is pleased to partner with the capabilities of GTG whose manufacturing facilities are state of the art. The partnership brings together high fidelity engineering with high quality gear manufacturing. In addition, GTG's track record in producing aerospace gears and certification to AS9100 and NADCAP is synergistic with producing safe and reliable products for aviation requirements.

(V-Bond Lee, P. Eng.) "As owner of AMP, with over 30 years of engineering experience I am very excited to partner with GTG, as AMP now offers a full service capability in gear design and manufacturing. GTG represents outstanding value, leadership and professionalism in line with AMP's values."

Companies requesting quotes or information on Great Taiwan Gear's capabilities can contact V-Bond Lee at vlee@advancedmobilityproducts.com or call 289-926-7049.
